ENERCON SECOND-LIFE

We offer an extensive selection of high-quality parts for Enercon wind turbines, including main components, electrical PCBs, sensors, and generators. Each part is carefully refurbished and rigorously tested to meet our stringent second-life standards, ensuring reliability and performance comparable to new. Our comprehensive inventory allows you to reduce downtime, improve efficiency, and extend the lifespan of your turbines with confidence, backed by our commitment to quality and sustainability.

Our parts service Includes:

- Supply of refurbished parts
- Manufacturing of parts and reverse engineering services
- Specialist tooling sales and rental services
- Component exchange services

All of our parts and tooling adhere to the highest quality standards, undergoing rigorous testing to ensure reliability and performance.

WE PRIORITISE QUALITY

'Our engineers, project managers, and technical specialists uphold the highest professional standards to deliver exceptional service quality'
